RAPTOR®

TOUGH AND TINTABLE PROTECTIVE COATING

RAPTOR Tough and Tintable Protective Coating is a durable urethane coating that provides surfaces with a protective barrier that can withstand the toughest situations.

Developed to tolerate most climatic conditions, **RAPTOR** is U.V. Resistant and won't fade or "chalk" even after hours in the sun. **RAPTOR** is also water resistant and helps to protect surfaces from rust, making it perfect for surfaces that are frequently exposed to water, including salt water.

RAPTOR's versatility makes it perfect for almost any application. Spray or roll **RAPTOR** on high traffic areas; it's scratch and stain resistant and easy to clean, simply hose it off. Its flexible formulation can handle impacts without cracking, making it perfect for its most popular application as a truck bedliner.

RAPTOR is unlike other bedliners or protective coatings. 2-component urethane technology far surpasses the durability of epoxy and 1-component coatings. And in case it does scratch (which is tough to do!), **RAPTOR** can easily be repaired. You can't do that with most of the other bedliners and protective coatings!

RAPTOR protects industrial surfaces in the harshest environments as well as the smaller surfaces we rely on every day. It's durable, tintable, looks great and lasts a long time.

IDEAL FOR MULTIPLE APPLICATIONS

USE ON VARIOUS SURFACES

1K RAPTOR Tough Undercoating Aerosols

RAPTOR Tough Undercoating is ideal for protecting underbodies, rocker panels and wheel wells from stone chips, salt damage, moisture and rust. Its 1K heavy duty formulation gives a durable, abrasion resistant finish which acts as a barrier against stone damage and corrosion. It's perfect for covering weld marks and seams and when used in the engine compartment can also help with sound dampening. **RAPTOR** Tough Undercoating has excellent adhesion and can be directly applied to properly prepared metal, aluminium, fiberglass and plastic and dries to form an attractive, textured.
