

RAPTOR 2K EPOXY ANTI-CORROSIVE PRIMER 4:1 MIX

TECHNICAL DATA SHEET & PROCESS GUIDE

U-POL Raptor Epoxy primer is a 2K anti-corrosive VOC compliant primer with excellent salt spray resistance for application to most substrates.

Suitable as a primer or as a primer filler for industrial refinish applications, the primer also provides excellent antirust protection.

PROPERTIES

- Easy to apply
- Excellent anti-corrosion resistance
- Good sanding
- Excellent topcoat gloss holdout
- · Wet-on-wet process with a long open time for topcoat application
- Chromate and Lead free
- Excellent opacity and coverage
- Available Colours
 Grey semi gloss

TECHNICAL DATA

Substrates

- Aluminium Galvanized
- Mild Steel SMC
- E-coat
 - Polyester Fillers

APPLICATION GUIDE

Hardener Selection

Please note this product is only compatible with the Epoxy Primer Hardener

Substrate Preparation

U-POL Epoxy Primer can be applied directly to suitably prepared rust without a requirement for chemical preparation.

In all cases, loose and flaky material should be removed to ensure that the metal is returned to be a sound substrate before applying the primer.

Sufficient abrasion / blasting must always to be employed to create a key to ensure adhesion of the primer.

The degree of substrate preparation required depends on the severity of the prior corrosion and the exposure conditions anticipated during the coatings service life.

For light corrosion / mild exposure conditions mechanical hand preparation (for example to the industry standard method SSPC-SP2 (SSI-St3)) or mechanical powertool preparation (for example to the industry standard method SSPC-SP3 (SSI-St3)) may be sufficient to prepare the surface.

For heavy corrosion / severe exposure conditions, removal of rust by abrasive blasting (for example to the industry standard method SSPC-SP10 (SSI-SA2.5)) is recommended.

For work which carries a warranty of performance this is the advised method, as lifetime

For more details on surface preparation of corroded surfaces it is recommended that specialist advice is sought, eg from NACE or other similar industry body. See https://www.nace.org/home.aspx

To achieve best results, good preparation is essential. Degrease with U-POL Degreasers (S2000, S2001 or S2002).

Abrade the surface as follows:

Bare Metal (mild steel): abrade with P80.

Aluminium and Galvanized abrade with P180.

U-POL Bodyfillers : dry sand with P180 - P240

Wood or plywood: dry sand with P180 -P240 to achieve a smooth surface free from loose fibres

GRP, SMC, Glass fibre, Polyester Filler: dry flat with P180 P240.

For all substrates, once abraded, clean once more with SYSTEM 20 Degreasers and dry thoroughly.

TECHNICAL DATA SHEET & PROCESS GUIDE

Wet - on - wet Over Painting process @ 20°C air dry

After 60 minutes of the final coat and up to 7 days the epoxy primer can be directly overcoated with 2K polyurethanes such as U-POL RAPTOR without the need to reopen the surface by sanding. After 7 days the surface will need abrading as per the table above

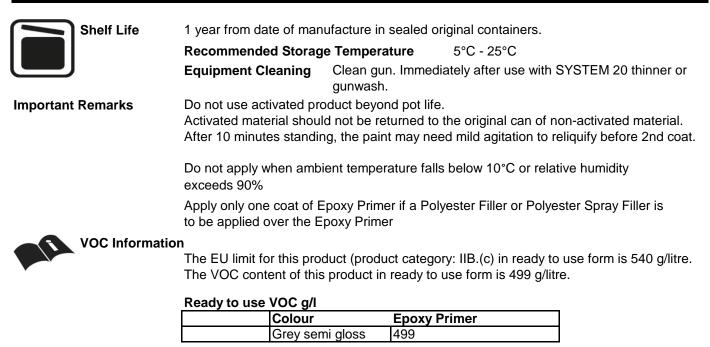

Dry - on -dry process @ 20°C air dry

After 8 hours it can be overcoated with U-POL bodyfillers

Typically the Epoxy Primer formulation is used in Industrial refinish where RAPTOR or a 2K topcoat is directly applied

This Epoxy primer is not recommended for use with water based paint systems

STORAGE & VOC INFORMATION

IMPORTANT: FOR PROFESSIONAL USE ONLY. Read full instructions before use.

This product contains hazardous materials and therefore appropriate personal protective equipment should always be used. Please refer to the label and consult the safety data sheet for full handling instructions and personal protection information. U-POL disclaims any liability where the user does not wear the recommended personal protective equipment. The above data is for information only and may change without prior notice. It is the Buyers responsibility to ensure the suitability of the products for their own use and check the information is up to date. The recommendation of use of our products and application in our technical data sheets are based on our knowledge and experience.
